

Ravshan Rakhmonberdiev

SUMMARY

Backend and Data Engineer with almost 3 years of experience building scalable backend systems and data-driven applications. Currently leading the technical development of [Magi](#), an exam monitoring platform for universities in Uzbekistan. Skilled in **JavaScript**, **TypeScript**, **Node.js**, **Next.js** and **PostgreSQL**, with expertise in API design, **system architecture**, and **database modeling**. Experienced in designing technical architectures with [Miro](#) and collaborating through **GitHub** to deliver secure, high-performance, and scalable software solutions.

TECH STACK (Typescript & pgSQL)

Backend: **Node.js Express, Rest APIs, Socket.io, PostgreSQL, MongoDB**

Frontend: **Next.js, React, VITE, CSS, Tailwind CSS**

Tools & DevOps: **Docker, Git, GitHub Actions, SMTP, Postman, Miro**

EXPERIENCE

Chief Technology Officer (CTO), [Magi](#)

May 2026 – Ongoing

Leading the technical development of **Magi**, an exam monitoring **web platform** for private and public universities in Uzbekistan. Designed the **system architecture** and **database infrastructure** using **Miro** platform. **Optimized** performance by replacing multiple database **queries** with **SQL functions**, **reducing** API response time by approximately **20–60ms**. **Recruited and managed** developers to accelerate product delivery and ensure scalability. The platform has already attracted interest from entrepreneurs [Umidjon Ishmukhamedov](#) and [Akmal Paiziev](#) while still in development.

PROJECT

CEO & Founder of RavAcademy (development process)

Feb 2026 – Ongoing

Next.js, TypeScript, PostgreSQL, MongoDB, Docker, GitHub Actions

- Built a **full-stack learning platform** that has personalized roadmaps for **junior developers** based on skill level, goals, and interests.
- Designed a **hybrid data architecture** using **PostgreSQL** for overall project **structure** and **MongoDB** for flexible learning resources and user-generated content.
- Implemented core backend services, including user progression tracking, exercise retrieval, user profile management, and dashboard analytics for learning performance.
- Designed interactive programming exercises that teach language fundamentals through **real-world problem solving**, supported by **visual aids** and **solution walkthrough videos**.
- Architected a modular system with **containerized deployment** (Docker) and CI/CD pipelines using **GitHub Actions** for automated testing and deployment workflows.

CERTIFICATES

JavaScript and CSS - Exercim bootcamp (over a year):

- [Exerism-Part1](#) (6m)
- [Exercism-Part2](#) (8m)
- [Node.js](#) (47h)
- [TypeScript](#) (23h)

EDUCATION

Gisma University of Applied Science, Germany. Beng Software Engineering

Jul 2025 - Jul 2028

Languages:

- English - C1 | Russian – C1 | German – A2

Piscine Student – [42 Berlin](#)

Oct - Nov 2025

- Completed the selective one-month **42 Berlin Piscine**, an intensive and highly competitive software **engineering training program**. Worked on daily team-evaluated projects under **strict deadlines**, developing strong **problem-solving abilities**, self-learning discipline, **debugging skills**, and **collaborative mindset** through peer reviews and continuous performance ranking.
